UCL Université catholique de Louvain

LANGL1856

2015-2016

Medical English for Dentistry students

5.0 credits	60.0 h	1 + 2q

Teacher(s) :	Deneumoustier Aurélie ;
Language :	Anglais
Place of the course	Bruxelles Woluwe
Inline resources:	http://moodleucl.uclouvain.be/
Prerequisites :	The LANGL1854 course or any other equivalent course (Speaking, Reading and Listening skills roughly corresponding to the B1 lower level of « the Common European Framework of Reference for Languages »).
Main themes :	To fulfil these objectives, teaching activity will focus on the following: -- Understanding in detail texts on subjects relating to general medical topics and his/her area of study (dentistry) -- Understanding in detail audio-visual texts on general topics and topics relating to his/ her area of study. -- Expressing oneself on a range of subjects relating to his or her area of study, participate in a conversation without preparation, express an opinion. -- Building up of medical and scientific vocabulary -- Reinforcement of specific grammatical structures
Aims :	The course aims to enable the student to improve his or her knowledge of grammar, general and specific vocabulary related to medicine in general and dentistry in particular, and to integrate reading and listening strategies required for pursuing the English training. At the end of the module, the student should have reached level B1 (Upper) of the Common European Framework of Reference for Languages in four areas: -- reading comprehension -- listening comprehension -- speaking -- language work (vocabulary and grammar) *The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".*
Evaluation methods :	-- Continuous assessment. -- Termly grammar and vocabulary tests. -- Presentation in class. -- 2 written examinations (at the end of each term).
Teaching methods :	Course based on different medical and scientific topics presented as reading text and videos (authentic material). -- Students prepare the reading texts at home using reading strategies acquired. -- Video input is analysed extensively and intensively. -- Consolidation and improvement of grammar use and vocabulary accuracy. -- Students make an oral presentation on a chosen medical topic, using material from different English-speaking sources.
Content :	The course aims at developing the reading and listening skills of the students as well as improving command of the language (general and specific vocabulary, grammar).

Bibliography :	-- Course notes -- Self-tuition material (Moodle platform) -- Vocabulary Book
Other infos :	Training staff -- Teacher may be contacted by email and is available on the Woluwe campus on course days. Other -- Organisation: maximum of 25 students per group.
Faculty or entity in charge:	ILV
