CPI2MC - Introduction

Introduction

CPI2MC - Teaching profile

Learning outcomes

The general objective of this programme is to provide advanced training for psychologists who wish to work in the field of clinical psychology for children, teenagers and adults.

The precise objectives are:

- to improve practical knowledge relating to psychological interviews, psychological assessment in the areas of psychopathology, interpersonal relations and learning and development difficulties, planning and implementation of an intervention project and evaluation of its effectiveness (in coordination with other professionals), working in a network and the management of interprofessional relationships. These objectives are achieved through different kinds of teaching : for example, case analysis and discussion, learning by problem solving and presentations by professionals.
- to promote the application of theoretical and practical knowledge in a clinical environment and the acquisition of professional skills through a placement and a seminar on practice.
- to emphasize the links between theoretical and practical knowledge by producing a dissertation in the form of a detailed case study or applied research.

Programme structure

The training, including the placement, the assessments and the production of a dissertation, is for 60 credits, which may be spread over three years.

CPI2MC - Information

Admission

In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail

Decree of March 31st 2004 defining higher education, favoring its integration in the European framework of higher education and refinancing universities.

The admission requirements have to be met at the time of enrolment at the university.

The mentioned information may of modification for 2014-2015

All information can be obtained from the [University's Enrolment Office \(Service des inscriptions – SIC\)](#).

The following students, after meeting the conditions set by the academic authorities, have access to the complementary Master's degree with the aim of obtaining the grade that these studies sanction:

- An academic Master's degree within the same field allowing 2nd-cycle studies, including at least 120 credits
- An academic Master's degree, following a decision by the academic authorities, under the complementary conditions that they set and as a result of a motivated decision by the jury
- An academic grade which is similar to those mentioned above, issued by the Flemish Community, the German Community or the Royal Military Academy, under the same conditions
- A foreign academic grade that has been acknowledged as being equivalent to those mentioned above, in application of this decree, a European-level directive or an international convention, under the same conditions
- Under the same conditions, one or several titles or academic grade issued by the Flemish Community, the German Community or the Royal Military Academy, sanctioning 2nd-cycle studies and valued at least 300 credits by the jury, or sanctioning 2nd-cycle studies and valued at least 240 credits completed of 60 credits, the all that must be valued by the jury according to the decree of March 31st, 2004 (art 54, 5 °)

In the event of the divergence between the different linguistic versions of the present conditions, the French version shall prevail

Specific Admission Requirements

The special admission conditions for this programme are as follows :

Students who hold a Master or equivalent level in Psychology may join the programme of the Advanced Master in Multidisciplinary Psychotherapy. Candidates must be able to provide evidence of supervised clinical activity of at least 900 hours within the framework of a programme approved by the Advanced Joint Master or undertake to provide such evidence before the end of the programme.

As far as the prerequisites are concerned, candidates may submit a request for equivalence to the academic committee of the Advanced Joint Master programme providing they can produce evidence of a minimum of 900 hours of supervised clinical activity in the area of clinical psychology or psychiatry.

Students must enrol and pay the relevant enrolment fees in the university or academy of their choice. If students only enrol at the partner institution, they must also enrol at the Louvain Academy in the year when their degree is to be awarded. The basic Belgian university enrolment fee does not cover the additional costs of fulfilling these admission requirements.

Accessible to adults

Programme designed for holders of a 2nd cycle degree in psychology.

Teaching method

Importance given to practical training : the work placement and the dissertation account for half the 120 credits in the programme. These activities are closely supervised by all the professors and assistant teaching staff at the Faculty.

Evaluation

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

There will be a written examination for courses with high attendance. For other courses there will either an oral examination, individual work or group work. Further details can be found in the course specifications.

Mobility and/or Internationalisation outlook

There are partnerships with the University of Geneva : a part of the Master in Psychology (20 credits) may be taken in this partner universitie.

Possible trainings at the end of the programme

The Advanced Joint Master is an inter-university training programme worth 60 credits. At the end of the programme, a degree is jointly awarded by the partner universities (Louvain Aacademy / University of Geneva).
