### Programme structure

The programme is spread over two years of study. It is made up partly of core subjects : all the first year courses (60 credits), the work placement and the dissertation (30 credits) and partly of 4 special subjects worth 15 credits each. Students must choose one of these together with an optional subject from the other special subjects for a total of 15 credits.

To gain approval of their individual programmes, as well as agreement to replace courses which have already been studied, students must see the Academic Secretary.

*For a programme-type, and regardless of the focus, options/or elective courses selected, this master will carry a minimum of 120 credits divided over two annual units, corresponding to 60 credits each.*

## Course prerequisites

---

A document entitled [en-prerequis-2015-sex2m.pdf](#) specifies the activities (course units - CU) with one or more pre-requisite(s) within the study programme, that is the CU whose learning outcomes must have been certified and for which the credits must have been granted by the jury before the student is authorised to sign up for that activity.

These activities are identified in the study programme: their title is followed by a yellow square.

As the prerequisites are a requirement of enrolment, there are none within a year of a course.

The prerequisites are defined for the CUs for different years and therefore influence the order in which the student can enrol in the programme's CUs.

In addition, when the panel validates a student's individual programme at the beginning of the year, it ensures the consistency of the individual programme:

- It can change a prerequisite into a corequisite within a single year (to allow studies to be continued with an adequate annual load);
- It can require the student to combine enrolment in two separate CUs it considers necessary for educational purposes.

For more information, please consult [regulation of studies and exams](#).

## The programme's courses and learning outcomes

---

For each UCL training programme, a [reference framework of learning outcomes](#) specifies the competences expected of every graduate on completion of the programme. You can see the contribution of each teaching unit to the programme's reference framework of learning outcomes in the document "In which teaching units are the competences and learning outcomes in the programme's reference framework developed and mastered by the student?"

The document is available by clicking [this link](#) after being authenticated with UCL account.

## Teaching method

---

Interdisciplinary teams of teaching staff.

## Evaluation

---

The evaluation methods comply with the [regulations concerning studies and exams](#). More detailed explanation of the modalities specific to each learning unit are available on their description sheets under the heading "Learning outcomes evaluation method".

Courses with high attendance will have a written examination. For other courses, assessment may take the form of an oral examination or a piece of individual work. The precise nature of the assessment will be clarified by the lecturer in charge at the beginning of each course.

## Mobility and/or Internationalisation outlook

---

Designed as a group of thematic modules, this programme fits in with other partners, both by borrowing or lending different components. The Institute's special partners (University of Quebec - Montreal, REDIF, University of Lille) also work in the same way.

## Possible trainings at the end of the programme

---

Advanced Masters :

Doctoral programmes : currently doctorate in Psychology and Education. Discussions under way with the Faculty of Economics and Political Science.

## Certificates

---

Aucun sous-ensemble de ce programme ne peut constituer un certificat d'université
