

11.0 credits

0 h + 220.0 h

1+2q

Teacher(s) :	Francaux Marc ; Gérard Philippe ; Thonnard Jean-Louis ; Heglund Norman (coordinator) ;
Language :	Français
Place of the course	Louvain-la-Neuve
Main themes :	The student will participate in the research activities within a pre-determined team for a total of 220 hours minimum. The topic of research will be in relation to the work performed during the first year of the master program. The student will report his activities into a laboratory diary and will present his work under the form of a written report at the end of the second year of the master program. These results will also be presented as an oral communication during the course " Introduction to scientific communication".
Aims :	The aim of this activity is to allow the student to continue developing his scientific approach in the field of exercise science. He will continue working on his research project initiated during the first year of his master program. The aim is to conclude the project by presenting final results under the form of a written report. <i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i>
Content :	No specific content. The student will participate in research activities within a research team and is in agreement with the (s) holder (s).
Other infos :	Pre-requisite : IEPR 1026 - Statistics Evaluation : Written report - lab diary Supervision : Titular professor(s) and, if appropriate, the promoter of the master thesis
Cycle and year of study :	> Master [120] in Motor Skills: Physical Education
Faculty or entity in charge:	FSM
