PW1/2: Geomorphological analysis from topographic maps  PW3: Use of digital terrain models (DTM) in geomorphology  PW4: Field preparation  PW5: Field work  PW6: Analysis of field data  PW7&amp; : Geomorphological analysis from aerial photos</p> <p>Personnal work  Literature review (16 hrs)  Field analysis report (20 hrs)  With supervision, the possibility of consultations (during the weeks before the deadline dates).</p> <p>Notions acquired:  Bibliographic research  Capacity to analyse the results of sampling and to describe them clearly in a report.</p>
Aims :	<p>Knowledge:  To understand the interaction between morphology, the materials and the exogeneous processes on slopes.</p> <p>Skills:  To acquire experience in field work, sampling, sample analysis (A level).  To acquire experience in interpretation of material expression and the processes in the scenery morphology from maps and aerial pictures (B level).</p> <p>To be capable of analyzing and interpreting the results of a field campaign.</p> <p><i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i></p>
