Teacher(s) :	Nyembwe Musungaïe André ;
Language :	Français
Place of the course	Louvain-la-Neuve
Main themes :	The study of issues in Macroeconomics will build on basic concepts from economic theory (supply, demand and market equilibrium). It will be important for students to be able to move from these basic concepts to analyse concrete topical issues such as revenue, employment, world trade, the financial markets and the movement of capital, the causes of recessions and elements favouring growth.
Aims :	This course aims to give students the foundations they need to understand the evolution of "macroeconomic" variables such as production, employment, inflation, competition, etc., the objective being to enable them to analyse the evolution observed, the role of institutions and public authorities and the advantages and the disadvantages of a range of economic policies. <i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i>
Content :	<p>Course content</p> <p>The course will tackle a succession of issues including: market power and competition policy, the factors determining long term growth and development, the link between currency, exchange rates and open-economy inflation, current economic fluctuations and the role of budgetary and monetary policies, the relation between inflation and unemployment, labour market policies and the Social Security system, the major economic policy debates.</p> <p>Method</p> <p>The course adopts an inductive approach, in the sense that the starting point lies in putting questions which challenge the students directly, in order to present the key concepts.</p>
