|------------------------------|--|
| Teacher(s) : | |
| Language : | Français |
| Place of the course | Louvain-la-Neuve |
| Main themes : | |
| Aims : | <p>By realizing his thesis, the student will have shown his/her aptitude to master the literature relating to a scientific question in psychological sciences, to make a theoretical and critical synthesis, resulting in a work hypothesis which will be submitted to tests, and to discuss these elements in a critical way, and in the light of existing literature.</p> <p>Besides the issues related to the research question and the theory around the hypothesis, the thesis will include the set up and the realization of an empirical study as well as the analysis and discussions of collected data.</p> <p>A thesis without collection of original empirical data is also possible. It would then have to be about a critical review of quantitative or qualitative (meta-analysis) literature. In particular situations, an exclusively theoretical question could also be possible.</p> <p><i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i></p> |
