1q

Teacher(s) :	van Wesemael Bas ;
Language :	Français
Place of the course	Louvain-la-Neuve
Main themes :	<p>This course introduces the process, materials and landforms of the main geomorphic systems. First, the exogenous process and their relative intensities will be reviewed for different climatic zones. Then the production of soil and unconsolidated materials through weathering will be discussed and finally, the main geomorphic systems will be reviewed such as hillslopes, rivers, glaciers and coasts.</p>
Aims :	<p>This course introduces the concepts of geomorphology i.e. the interaction between processes, materials and land forms. At the end of the course students should be able to:</p> <p>Describe the most important interactions between process, materials and land forms within the main geomorphic systems (hillslopes, rivers, glaciers and coasts)</p> <p>Interpret the morphology and the dominant processes in a given landscape using topographic maps and aerial photographs</p> <p>Represent the spatial variation in soil characteristics of a hillslope and its impacts on the infiltration rates based on the interpretation of data collected in the field.</p> <p><i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i></p>
Content :	<p>This is an introductory course in geomorphology, one of the main disciplines in physical geography. The lectures describe the interactions between processes, materials and landforms, while the main geomorphic systems will be introduced i.e. hillslopes, rivers, glaciers and coasts. Practical work focuses on interpretation of landscape forms and dominant processes from topographical maps and aerial photographs as well as field data collection and analysis.</p>
Other infos :	<p>Prerequisites : None</p> <p>Evaluation : Written exam, course work counts for a third of the final grade.</p> <p>Support : Lecture notes and textbook 'Fundamentals of the Physical Environment' D. Briggs et al. Two copies are available in the library (BSE).</p>
Cycle and year of study :	<p><a href="#">&gt; Master [120] in History of Art and Archaeology : General</a></p> <p><a href="#">&gt; Bachelor in Information and Communication</a></p> <p><a href="#">&gt; Bachelor in Philosophy</a></p> <p><a href="#">&gt; Bachelor in Pharmacy</a></p> <p><a href="#">&gt; Bachelor in Psychology and Education: General</a></p> <p><a href="#">&gt; Bachelor in Economics and Management</a></p> <p><a href="#">&gt; Bachelor in Motor skills : General</a></p> <p><a href="#">&gt; Bachelor in Human and Social Sciences</a></p> <p><a href="#">&gt; Bachelor in Sociology and Anthropology</a></p> <p><a href="#">&gt; Bachelor in Political Sciences: General</a></p> <p><a href="#">&gt; Bachelor in History of Art and Archaeology : General</a></p> <p><a href="#">&gt; Bachelor in Mathematics</a></p> <p><a href="#">&gt; Bachelor in History</a></p> <p><a href="#">&gt; Bachelor in Biomedicine</a></p> <p><a href="#">&gt; Bachelor in Religious Studies</a></p> <p><a href="#">&gt; Bachelor in Geography : General</a></p> <p><a href="#">&gt; Bachelor in Engineering : Architecture</a></p> <p><a href="#">&gt; Bachelor in Computer Science</a></p> <p><a href="#">&gt; Bachelor in Engineering</a></p> <p><a href="#">&gt; Bachelor in Physics</a></p>
Faculty or entity in charge:	GEOG
