

5.0 credits	30.0 h + 30.0 h	1q
-------------	-----------------	----

Teacher(s) :	Bayot Vincent (coordinator) ; Flandre Denis ; Raskin Jean-Pierre ; Francis Laurent ;
Language :	Anglais
Place of the course	Louvain-la-Neuve
Inline resources:	http://icampus.uclouvain.be/claroline/course/index.php?cid=LELEC2550
Prerequisites :	Background in physics of electronic devices (e.g. LELEC1330)
Main themes :	<p>Training on special electronic devices. At the R& mp;D level, topics will change every year to track last developments, in phase with students interests for specific devices.</p> <p>Examples : exotic silicon or SOI devices, photovoltaïcs, SiGe, organic and molecular devices, optoelectronics, MEMs-NEMs, RF devices (HEMT, ballistic), RTD, SET, sensors...</p>
Aims :	<ul style="list-style-type: none"> - AA1.1, - AA2.1, 2.3, 2.5, - AA3.1, 3.3, AA4.1, 4.2, 4.3, 4.4, AA5.3, 5.4, 5.5, 5.6, AA6.1, 6.2, 6.3 Once completed this teaching, students will be able to : - Understand the physics underlying special electronic devices (R& mp;D in academic and indutry labs). - Make extended bibliographic searches, critically analyse available informations and synthetize them. - Present their work in written and oral forms. <p><i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i></p>
Evaluation methods :	Report (66%) et oral presentation (33%) of team work
Teaching methods :	<ul style="list-style-type: none"> - Group or individual work on a topic chosen by the students, and accepted by the course coordinator, in the field of special electronic devices (bibliography, experiments, simulations, and any means useful for in depth understanding of the choosen devices). - Close interactions (individuals or groups) with the coordinator to solve faced problems (topic definition, understanding, bibliography, writing,... (see below)). - Interactions with researchers in UCL and outside UCL. - Training to the writing of a scientific review article in english. A schedule is followed along the semester (informations, plan, centent, writing) - Oral presentation - Publication on the Web (if wished by the students).
Content :	Devices are choosen by the students, in agreement with the coordinato.
Bibliography :	Web, scientific journals, books
Cycle and year of study :	<ul style="list-style-type: none"> > Master [120] in Chemical and Materials Engineering > Master [120] in Electro-mechanical Engineering > Master [120] in Physical Engineering > Master [120] in Electrical Engineering
Faculty or entity in charge:	ELEC
