Teacher(s) :	Sonnet Philippe ; De Keersmaecker Marie-Laurence ;
Language :	Français
Place of the course	Louvain-la-Neuve
Main themes :	The 4 days of fieldwork are devoted to an examination of aspects of the geology of Belgium to illustrate, in three dimensions, the basic geological phenomena treated in the courses AGRO1100 and GEO1251. The various features of physical geography are considered in context, and attention is given to the exploitation of rocks and their uses.
Aims :	Initiation into the methods of observation, analysis and interpretation of geological phenomena in the field, viewed in their regional context. <i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i>
Cycle and year of study :	<a href="#">&gt; Bachelor in Geography : General</a>
Faculty or entity in charge:	GEOG
