Teacher(s) :	Godin Philippe ;
Language :	Français
Place of the course	Louvain-la-Neuve
Main themes :	<p>This course highlights how the psychological dimension can influence the practice of sport and exercise and vice versa. The psychology of sport is mainly based on a conception of a normal human being, but in special situations. The laws of psychology come into play in the search for greater efficiency, related to a kind of well-being (emotional control, motivation theories, personality, aggressiveness, group cohesion etc.).</p> <p>Sport and exercise are considered through various sections of the population : children, adolescents, talented young sportsmen and women, high level athletes, physically and mentally disabled people, delinquents and other sections linked to cultural and gender differences. This course shows how the application of psychology to sport and exercises can, in some cases, promote achievement, good physical and mental health, rehabilitation and, in other cases provide a route to excellence in sport or face extreme situations. Excessive and deviant aspects are also presented (burn-out, food disorders, dependence etc.).</p> <p>Some scientifically validated tools, techniques and methods for mental and psychological preparation are presented.</p>
Aims :	<p>To familiarize students with the psychology of sport and exercise the psychology of sport and exercise.</p> <p><i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i></p>
