Language :	Français
Place of the course	Bruxelles Woluwe
Prerequisites :	The prerequisites are the course of respiratory physiology FYSL 1211 and 1311. The main points of the lecture can be found on the ICampus platform.
Main themes :	Anatomy, semiology and respiratory physiopathology are very linked together. The lecture will be given in one hour about the classical respiratory semiological signs which are the anamnesis, inspection, palpation and auscultation of the chest. We will concluded by an introduction to big disorders i.e. dyspnea, cough or thoracic pain through clinical cases in order to initiate workgroups.
Aims :	<i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i>
Evaluation methods :	These groups should prepare an original oral presentation and text that will be shared with the other groups under the supervision of the teacher. This work will be rated. A multiple choice examination common to the other parts of the course is planned as well.
Cycle and year of study :	> Bachelor in Medecine (Bachelor + Master : 7 years)
Faculty or entity in charge:	MED
