

Teacher(s) :	Couwenbergh Jean ; De Smedt Thierry ;
Language :	Français
Place of the course	Louvain-la-Neuve
Main themes :	<p>1. Eléments d'une culture générale en informatique :</p> <ul style="list-style-type: none"> - définition de l'informatique et de l'ordinateur - aperçu historique et évolution de l'informatique - le codage binaire - la numérisation - technologies de base des médias (sons, images) - langages de programmation, systèmes d'exploitation et logiciels d'application - principes de fonctionnement des réseaux de communication informatiques. <p>2. Initiation informatique :</p> <ul style="list-style-type: none"> - introduction au traitement informatique de bases de données et initiation aux logiciels appropriés - introduction au traitement informatique de documents sonores et iconiques et initiation aux logiciels appropriés - introduction aux logiciels de composition de multimédias et aux techniques associées <p>3. Analyse des enjeux de la communication multimédia :</p> <ul style="list-style-type: none"> - introduction au statut de l'information multimédia - initiation aux outils de recherche d'information sur Internet <p>1. An introduction to the field of Information Technology:</p> <ul style="list-style-type: none"> - definitions of Information Technology and the computer - a historical overview of computer science and its development - binary code - digitization - basic media technologies (sound, image) - programming languages, operating systems and application software - principles of computer network communication <p>2. Practical computer skills:</p> <ul style="list-style-type: none"> - introduction to working with computerised databases and relevant software - introduction to working with sound and image files and to relevant software - introduction to multimedia composition software and related techniques - introduction to working with the Internet: web sites and communication tools <p>3. Analysis of issues in multimedia communication:</p> <ul style="list-style-type: none"> - introduction to the status of multimedia information - introduction to Internet search engines - critical evaluation of sources available on the Internet
Aims :	<p>By the end of this course, students should have acquired:</p> <ul style="list-style-type: none"> - a broad background in Information Technology, key concepts in Information Technology and networking, basic knowledge of computer systems (materials, functioning, basic software, multi-media technology and Internet) - theoretical and practical working knowledge of the principal IT applications within Social Sci-ences (multimedia applications and Internet, document presentation and word processing) - critical skills in the field of multimedia communication <p><i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i></p>
Content :	<p>Method</p> <p>The course is structured around a series of lectures with use made, wherever possible, of inductive teaching methods (through illustrations, demonstrations, problem solving) and concrete demonstrations.</p> <p>The course includes 15 hours of practical computer skills teaching which will take place in the Faculty computer labs.</p>
Other infos :	<p>Written exam</p> <p>course handout, notes and summaries, exercises and solutions, application software, data,</p> <p>Supervision : The practical course work (15 hours), for which students are split into small groups, is supervised by assistants.</p>
Cycle and year of study :	<p>> Bachelor in Information and Communication</p> <p>> Preparatory year for Master in Information and Communication Science and Technology</p>
Faculty or entity in charge:	ESPO
