Drawing 4: Presentation and presentation techniques [45h]

3.0 credits	45.0 h	2q

Teacher(s) :	Andrieux Frédéric ;
Language :	Français
Place of the course	Louvain-la-Neuve
Main themes :	Drawing as a tool for analysis and investigation, expression and communication: Parallel work in manual and computer-aided techniques. Intensive study of architectural drawing as a means of exploration and development of design, through repetitive practice of sketching and sketch design. Intensive study of software and presentation through progressive scaling of a particular design project (different viewpoints, 3D modelling, etc.). Understanding the difference between "finished" and "complete" drawings in the context of design practice, from design to construction. Exercises in project publication, photomontage, inclusion of text.
Aims :	By the end of this course, students will be able to: Use drawing as a support for expression, analysis and communication. Develop a sense of representation in manual and computer-aided design as regards shadows, light and colors, materials. *The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".*
