

5.0 credits

30.0 h + 30.0 h

2q

Teacher(s) :	Saerens Marco ;
Language :	Anglais
Place of the course	Louvain-la-Neuve
Inline resources:	<p>&gt; <a href="http://icampus.uclouvain.be/claroline/course/index.php?cid=sinf2275">http://icampus.uclouvain.be/claroline/course/index.php?cid=sinf2275</a></p>
Main themes :	<p>The course is structured around four themes</p> <p>--</p> <p>Complements of data mining,</p> <p>--</p> <p>Decision making,</p> <p>--</p> <p>Information retrieval,</p> <p>--</p> <p>Link analysis and web/graph mining .</p>
Aims :	<p>Given the learning outcomes of the "Master in Computer Science and Engineering" program, this course contributes to the development, acquisition and evaluation of the following learning outcomes:</p> <p>--</p> <p>INFO1.1-3</p> <p>--</p> <p>INFO2.2-3</p> <p>--</p> <p>INFO5.2</p> <p>Given the learning outcomes of the "Master [120] in Computer Science" program, this course contributes to the development, acquisition and evaluation of the following learning outcomes:</p> <p>--</p> <p>SINF1.M4</p> <p>--</p> <p>SINF2.2-3</p> <p>--</p> <p>SINF5.2</p> <p>Students completing this course successfully will be able to</p> <p>--</p> <p>explain quantitative and qualitative data mining methods and to apply them to decision making</p> <p>--</p> <p>develop a critical view of data mining techniques in specific application domains</p> <p>--</p> <p>master information retrieval techniques from very large data collection, possibly enriched with link structures (WEB, social networks, ...)</p> <p>--</p> <p>explain application of information retrieval techniques in the context of search engines and automated recommendation systems</p> <p>--</p> <p>implement data mining and information retrieval algorithms within standard software environments such as S-Plus, R, SAS, Weka or Matlab</p> <p><i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i></p>
Content :	<p>Complements of data mining</p> <p>--</p> <p>Canonical correlation analysis</p> <p>--</p> <p>Correspondence analysis</p> <p>--</p> <p>Partial least squares regression</p> <p>--</p> <p>Log-linear models</p> <p>--</p> <p>Association rules</p> <p>Decision making</p>

--  
Markov decision processes and reinforcement learning  
--  
Exploration/exploitation and bandit problems  
--  
Utility theory  
--  
Multi-criteria preference modeling - the Promethee method  
--  
Probabilistic reasoning with bayesian networks  
--  
Possibility theory  
--  
Two-players game theory  
--  
Collective decisions  
Information retrieval  
--  
The basic vector-space model  
--  
The probabilistic model  
--  
Ranking web pages :PageRank, HITS, etc.  
--  
Collaborative recommendation models (recommender systems) .  
Link analysis and web/graph mining  
--  
Network community detection  
--  
Similarity measures between nodes  
--  
Spectral graph partitioning and mapping  
--  
Reputation models
