Income taxation Part 4 Multiple jurisdictions 6. Fiscal federalism 7. tax competition Part 5 Issue of time 8. Intertemporal efficiency 9. Social security and pension crisis
Acquis d'apprentissage	This course is essentially an evaluation of the role of the public sector in a market economy. The course will use the most recent economic analysis to (re)consider the efficiency and distributive ef-fects of government intervention. The optimal design of government intervention both in terms of public expenditures and tax collection is also studied. The main objective of the course is to strike a balance between political and market failures in determining the form and the extent of government intervention. Students taking this course will acquire: 1 An understanding of the design of public spending and tax collection; 2 An understanding of the tradeoff between equity and efficiency 3 The skill to apply economic analysis to the public sector *La contribution de cette UE au développement et à la maîtrise des compétences et acquis du (des) programme(s) est accessible à la fin de cette fiche, dans la partie « Programmes/formations proposant cette unité d'enseignement (UE) ».*
Contenu :	Teaching is by one two-hour lecture twice a week which will present the core theoretical material based on the textbook by Hindriks and Myles "Intermediate Public Economics". Fortnightly two-hour tutorials will consist in solving problems. This should help to develop students' skill and agility in public economics as well as to check their understanding of the course.
