A la fin de cette activité, l'étudiant aura progressé dans sa capacité à: - Connaître et comprendre un socle fondamental des mathématiques. Il aura notamment développé sa capacité à: -- Reconnaître les concepts fondamentaux d'importantes théories mathématiques actuelles. -- Etablir les liens principaux entre ces théories. - Faire preuve d'abstraction, de raisonnement et d'esprit critique. Il aura notamment développé sa capacité à: -- Dégager les aspects unificateurs de situations et expériences différentes. -- Raisonner dans le cadre de la méthode axiomatique. -- Construire et rédiger une démonstration de façon autonome, claire et rigoureuse. Acquis d'apprentissage spécifiques au cours. A la fin de cette activité, l'étudiant sera capable de: - Classifier les formes quadratiques sur des corps particuliers, tels que les complexes, les réels, les rationnels, les corps de fonctions rationnelles et les corps complets pour une valuation discrète. - Utiliser les algèbres de Clifford pour reconnaître les formes quadratiques qui admettent la composition, étudier les groupes de rotations et définir des invariants des formes quadratiques. - Reconnaître les caractéristiques arithmétiques des corps qui s'expriment en termes de formes quadratiques, telles que le niveau ou le u-invariant, et utiliser les propriétés des corps de fonctions de quadriques pour établir leurs propriétés. *La contribution de cette UE au développement et à la maîtrise des compétences et acquis du (des) programme(s) est accessible à la fin de cette fiche, dans la partie « Programmes/formations proposant cette unité d'enseignement (UE) ».*
