Cohomologie de de Rham et diverses notions associées.
Acquis d'apprentissage	Contribution du cours aux acquis d'apprentissage du programme de master en mathématique. A la fin de cette activité, l'étudiant aura progressé dans sa capacité à : - Connaître et comprendre un socle fondamental des mathématiques. Il aura notamment développé sa capacité à : -- Reconnaître les concepts fondamentaux d'importantes théories mathématiques actuelles. -- Etablir les liens principaux entre ces théories. - Faire preuve d'abstraction, de raisonnement et d'esprit critique. Il aura notamment développé sa capacité à : -- Dégager les aspects unificateurs de situations et expériences différentes.

	-- Raisonner dans le cadre de la méthode axiomatique. -- Construire et rédiger une démonstration de façon autonome, claire et rigoureuse. Acquis d'apprentissage spécifiques au cours. A la fin de cette activité, l'étudiant sera capable de : - Maîtriser certains outils fondamentaux de la topologie différentielle qui pourront lui être utiles dans un travail de recherche en topologie, géométrie ou mathématique physique *La contribution de cette UE au développement et à la maîtrise des compétences et acquis du (des) programme(s) est accessible à la fin de cette fiche, dans la partie « Programmes/formations proposant cette unité d'enseignement (UE) ».*
