

5.0 credits	30.0 h + 15.0 h	1q
-------------	-----------------	----

Teacher(s) :	Gilles Françoise ;
Language :	Français
Place of the course	Louvain-la-Neuve
Main themes :	Study of the main kinds of life insurance products in terms of pricing and reserving
Aims :	The aim of this course is to present the basic principles of life insurance theory. After a short introduction to life tables, the main kinds of life insurance products are studied in detail regarding premium and reserve calculations. An introduction to modern life products is also presented. At the end of this course the students must be familiar with life calculations and be able to price life products. <i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i>
