

5.0 credits	30.0 h	2q
-------------	--------	----

Teacher(s) :	Defraigne Jean-Christophe ;
Language :	Anglais
Place of the course	Louvain-la-Neuve
Prerequisites :	Introduction to economics, history of European integration.
Main themes :	<ol style="list-style-type: none"> <li>1. Definition of economic integration.</li> <li>2. The process of European economic integration and the construction of the Single Market.</li> <li>3. The functioning of the European Single Market (including an introduction to industrial and competition policies in the EU).</li> <li>4. The cohesion policies.</li> </ol>
Aims :	This course will look into the evolution of economic and social integration within the EU and its immediate prospects. <i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i>
Evaluation methods :	Written or oral examination.
Content :	In order to comprehend the process of European integration, this course will look into the economic and institutional integration processes at the root of the creation of the Single Market. It will outline the prospects of integration in the different fields of the European economy. In this respect, this course will provide a short introduction to the tools used by the authorities to deepen the integration level in the European Union.  The course will analyze the evolution of social cohesion within the EU and the disparities between the different member countries from the origin of the European integration process to the present times. It will examine the elements and the policies which determine the level of economic and social cohesion within the Union. It will also assess the developments generated by the need to adapt to globalization and by the recent enlargements.
