Based on a comprehensive understanding, students will be technically able (i) to evaluate the income effects of alternative cost accumulation systems, (ii) to help managers make sound decisions, (iii) to implement those decisions through control procedures, and (iv) to ensure the global coherence between control procedures and the business strategy. Therefore, this course is concerned with both cost accounting and strategic management.- In addition, the course aims to enrich students' management control language, and hence to develop competences of communication.</p> <p><i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i></p>
Evaluation methods :	A personal written exam

Teaching methods :	The course combines, on the one hand, theoretical explanations and practical exercises and, on the other hand, visiting professionals' presentations. These presentations aim to initiate students into some pragmatic aspects of management control and to create and feed debates on management control issues faced by professionals today.
