Content :	This course provides an overview of the state-of-the-art theory, research, and practice in the field of professional learning and development. In the course we first elaborate on the role of learning and professional development in a knowledge economy and as essential part of an organizational strategy. A broad perspective on professional learning and development is put forward. Different theories and models of professional learning are discussed at multiple levels: individual, team, organization and network. The role of informal learning at work is put forward. Second, the characteristics of the learner at work at different professional stages are outlined: in the beginning and in the second half of the career. We will center on understanding the role of motivation in how adults learn and acquire expertise in a professional domain. Next, we discover why the workplace environment plays a major role in professional learning and development of workers. We will identify job characteristics that enhance or hinder learning and the different aspects of a powerful organizational learning climate. At last, various ways to facilitate formal and informal learning and development at work are discussed and illustrated (practices and tools).
