

Complements of pharmacognosy and of analysis of pharmacologically interesting natural substances.

3.0 credits	20.0 h + 10.0 h	2q
-------------	-----------------	----

Teacher(s) :	Leclercq Joëlle ;
Language :	Français
Place of the course	Bruxelles Woluwe
Main themes :	According to the interests of the students, the course will focus on the chemical, pharmacological or analytical aspects of one specific class of natural active molecules.
Aims :	The aim of this course is to increase the knowledge of the student on one defined class of natural compounds, their structures, sources, pharmacological properties and/or quantification and quality control methods. <i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i>
Content :	The student will realise an exhaustive bibliographical study on a topic chosen in collaboration with the teacher. This study will be based on documents given by the teacher and data base researches (Sci finder, Medline, Current contents,). A literature review will be written with the help of the teacher.
Other infos :	Prerequisite : pharmacognosy, analytical chemistry and/or pharmacology Evaluation: The evaluation will be based on the quality of the written review, of its oral presentation and its answers to questions.
Faculty or entity in charge:	FARM
