Langue d'enseignement	Anglais
Lieu du cours	Louvain-la-Neuve
Thèmes abordés	The course aims at providing tools enabling the students to elicit critical thinking on ethical, social and environmental issues raised by contemporary organizations. The specificity of the firms' impact on economic life will be addressed by analyzing the principles and practices covered by the field of Corporate Social Responsibility (CSR). CSR will be studied as a reflector of the modern firms' self-awareness process in terms of social responsibility and as a source of innovation in the face of today's challenges of competitiveness, sustainable development and transparent corporate governance. The theoretical references will moreover give way to more personal questioning periods developed by the students in terms of their own aspirations, perceptions and observations as citizens. All these elements foster personal change that in its turn conveys transformations within the chosen organizations.
