Thèmes abordés	The importance of entrepreneurial ventures in Europe has been recognized since the 1980s. Moreover, recent changes in the European economy have created new opportunities for entrepreneurial initiatives. Entrepreneurs are today seen as the drivers of the market economy and their activities provide wealth, jobs and diversity of choice for consumers. However, most business school programs are still oriented towards existing and/or large traditional firms. The purpose of this course is to introduce students to the specificities of entrepreneurial ventures and to help them understand how these firms are created and managed.
