## History of Economic Theories

5 credits	30.0 h	Q2

Teacher(s)	Pensieroso Luca ;				
Language :	English				
Place of the course	Louvain-la-Neuve				
Prerequisites	The prerequisite(s) for this Teaching Unit (Unité d'enseignement – UE) for the programmes/courses that offer this Teaching Unit are specified at the end of this sheet.				
Main themes	The course will examine: - the link between economic theory and liberalism - Marx's place in the history of economic theories - the relevance of the concept of scientific revolution - the mathematisation of the economy				
Aims	This course on the History of Economic Theories has two objectives. On the one hand, it aims to give students a view of how economic theories have developed, from the birth of Political Economics up to modern times. This should enable students to situate what they have learnt in their foundation courses within a broader framework and to relate it to the questions put by economists from previous generations. This historical approach will also provide an occasion for students to reflect critically on Economic Science, its objectives, methods, etc. They will have, for example, to investigate whether criticisms of economic methods, which tend to criticize its high degree of abstraction and mathematisation, are relevant.  The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".
