Aims	<p>This course is designed for students in civil engineering (FSA) and management (Louvain School of Management, IAG). The basic concepts and tools of environmental economics are presented and much attention is devoted to the toolkits used in environmental management and their implications within the firm (taxes, tradable permits, voluntary agreements 1). The methods used to assess the impacts of environmental policies on the firm are discussed. This course is given under the Chair Lhoist Berghmans in Environmental Economics and Management. In particular, it promotes an interdisciplinary approach and does pay attention to the interplay between individual and collective interests when facing environmental issues.</p> <p>----- <i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i></p>
