

5 credits

30.0 h + 15.0 h

Q2

Teacher(s)	Pecheur Charles ;
Language :	English
Place of the course	Louvain-la-Neuve
Main themes	<ul style="list-style-type: none"> • Software quality concepts • Program specification and correctness • Software testing • Software verification and validation • Software reviewing and audit • Software metrics and measurement • Software reliability
Aims	<p>Given the learning outcomes of the "Master in Computer Science and Engineering" program, this course contributes to the development, acquisition and evaluation of the following learning outcomes:</p> <ul style="list-style-type: none"> • INFO2.3-5 • INFO6.3 <p>Given the learning outcomes of the "Master [120] in Computer Science" program, this course contributes to the development, acquisition and evaluation of the following learning outcomes:</p> <ul style="list-style-type: none"> • SINF1.M3 • SINF2.3-5 • SINF6.3 <p>Students completing this course successfully will be able to:</p> <ol style="list-style-type: none"> 1. Define software quality and describe the role of quality assurance activities in the software process. ' Describe how a contract can be used to specify the behavior of a program component. ' Describe and distinguish among the different types and levels of testing (unit, integration, systems, and 'acceptance). Apply a variety of strategies to the testing and debugging of simple programs. Describe how available static and dynamic verification tools can be integrated into the software development 'environment. ' Apply formal specification and analysis techniques to software designs and programs with low complexity. ' Undertake an inspection of a medium-size code segment. Compare simple software measurement techniques. ' Describe approaches for fault estimation. ' Explain the problems that exist in achieving high levels of software reliability. ' <p>-----</p> <p><i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i></p>
Evaluation methods	The course includes assignments, counting for 40% of the grade, and an exam, counting for 60% of the grade. Assignments cannot be redone for the September session; the grade remains acquired in September.
