

5 credits	22.5 h + 15.0 h	Q2
-----------	-----------------	----

Teacher(s)	Ruelle Philippe ;
Language :	French
Place of the course	Louvain-la-Neuve
Main themes	1. Finite groups: fundamental notions and examples ; representations (tensors) ; characters ; tensor products (tensor algebra) ; illustrations on important finite groups (permutations and Young tableaux) ; applications ; 2. Lie groups and Lie algebras: generators ; classical groups ; representations of algebras ; representations of $su(2)$ and tensor products ; lifting to $SO(3)$; the $su(3)$ algebra ; representations of linear groups and Young tableaux ; applications.
Aims	<p>1 To give a systematic introduction to the theory of groups and their representations, and to demonstrate its usefulness in physics through selected applications.</p> <p>----</p> <p><i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i></p>
Other infos	Prerequisites BAC1 courses in algebra and calculus.
Faculty or entity in charge	PHYS

Programmes containing this learning unit (UE)				
Program title	Acronym	Credits	Prerequisite	Aims
Master [120] in Physics	PHYS2M	5		
Minor in Physics	LPHYS100I	5		
Minor in Mathematics	LMATH100I	5		
Additional module in Physics	LPHYS100P	5		
Additional module in Mathematics	LMATH100P	5		
Additional module in Mathematics	TMATH100P	5
