## Practical Study in Theatre Design

Teacher(s)	Lesage Daniel ;
Language :	French
Place of the course	Louvain-la-Neuve
Main themes	1
Aims	The course is practical in nature. Students will be required to design the stage-set for a theatre text of their choice. The various phases of design (analysis, documentation, creation) will result in the production of a model. Examination of a number of seminal examples of scenography. Production of a stage design and creation of a model by small groups of students. Collective or individual exchanges between teacher and students. Although it is an advantage, the ability to draw is not essential. However, students will be expected to gain appropriate outside help or acquire the skills of plastic expression that will enable them to produce their model.  The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".
Evaluation methods	Criteria for evaluation will relate to the student's commitment to the work, his analysis of the processes, the degree of accomplishment of his work, the defence of the choices he has made and his participation in discussions.
