

Language :	French
Place of the course	Bruxelles Woluwe
Main themes	The RS takes part in a research activity in a laboratory of the medical college. This activity includes a phase of formation, specific to the field of research considered, the regular presence at the meetings where the protocols and the results of research in progress are discussed, as well as a direct participation in research itself. For these activities, the RS will be supervised directly by a member of the academic or scientific community. The promoter will have regular personal contacts with the RS and will be thus responsible for his formation.
Aims	<p>1 The activity of researcher student (RS) is an introduction to the steps of the scientific method.</p> <p>-----</p> <p><i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i></p>
Content	Only the students having carried out the activity of RS in MED 23 are authorized to continue this activity in MED 24
Other infos	Report: The RS will send to the President of the Commission a complete report of its activities. This memory (ten pages) will be written in the form of a scientific paper. This report will be returned at the latest on October 30 and will be defended orally. Evaluation: note given by the Commission
