

5 crédits	30.0 h	Q2
-----------	--------	----

Enseignants	Chevalier Ludovic ;
Langue d'enseignement	Anglais
Lieu du cours	Louvain-la-Neuve
Préalables	1 basic marketing course
Thèmes abordés	<p><b>Introduction</b></p> <p>Humanity has generated and stored more data in the last 24 months than in the millions of years before that. World's data production, analysis, and consumption are growing exponentially and this trend is not slowing down anytime soon.</p> <p>In such environment understanding and working with data has become crucial for companies to survive, innovate and grow. For this reason, companies are more and more demanding of data literate workforce - and marketing is no exception.</p> <p>The fundamental pillars of marketing ' acquire and retain customers - will not change, but the means available to marketers to achieve their objectives are changing fundamentally. This course will introduce and delve into one of the most promising new mean available to marketers to achieve their objectives: Big Data.</p> <p>Themes that will be addressed are:</p> <p>Digital marketing (campaign/strategy), Big data, Data mining, Artificial Intelligence, AdWords, Analytics, SEA/SEO/SEM, Technologies, Multi-channel communication</p>
Acquis d'apprentissage	<p><b>On successful completion of this program, each student will acquire the following skills :</b></p> <ul style="list-style-type: none"> <li>• Knowledge, reasoning and critical thinking</li> <li>• Project management</li> <li>• Communication and interpersonal skills</li> <li>• Leadership and team working</li> </ul> <p>1</p> <ul style="list-style-type: none"> <li>• Analytical skills</li> </ul> <p><b>At the end of this course, you should be able to understand and use big data in order to:</b></p> <ul style="list-style-type: none"> <li>• Identify growth opportunities.</li> <li>• Personalise and automate marketing efforts.</li> <li>• Predict ROI of future marketing campaigns.</li> </ul> <p>-----</p> <p><i>La contribution de cette UE au développement et à la maîtrise des compétences et acquis du (des) programme(s) est accessible à la fin de cette fiche, dans la partie « Programmes/formations proposant cette unité d'enseignement (UE) ».</i></p>
Modes d'évaluation des acquis des étudiants	<p>Evaluation methods will be detailed later on.</p> <p>This year (2017-2018) the course is divided into two parts that are equally weighed: weekly lectures and, in parallel, a group project. The evaluation of the first part consists of an individual written exam based on the lectures given throughout the quarter. The methods of evaluation for the second part (i.e. this year the Digital Masters challenge organised by bloovi.me and Google: <a href="#">For more information click here</a>) will be specified on Moodle.</p>
Méthodes d'enseignement	Conferences, lectures, group project, exercises, articles, in-class/at-home activities, readings, self-study, discussions, case studies
Contenu	<p>The content of the lectures (first part) will be divided into 6 Modules:</p> <ol style="list-style-type: none"> <li>1. Understanding big data and data mining.</li> <li>2.
