Université catholique de Louvain - Ethical and Sustainable Consumption - cours-2018-Ilsms2023

UCLouvain IIsms2023 2018 Ethical and Sustainable Consumption 5 crédits 30.0 h Q2

Enseignants	Ruwet Coline ;Swaen Valérie ;				
Langue d'enseignement	Anglais				
Lieu du cours	Louvain-la-Neuve				
Préalables	None				
Thèmes abordés	This course is designed to increase awareness and provide tools for analyzing ethics, beliefs and attitudes related to marketing and consumption, and how they relate to issues of sustainability. One of the major causes of the deterioration of the global environment is the unsustainable pattern of consumption and production, particularly in industrialized countries. Beyond the necessity to promote efficiency in production processes there is a need to shift to more sustainable patterns of consumption (e.g., environmentally-friendly behaviors, local products consumption, voluntary simplicity, de-growth). In this context, this course addresses the question of consumer social responsibility in the transformation process towards more sustainable consumption-production-patterns from an environmental and social justice perspective. Moreover, based on some non-ethical practices quite frequently observed in practice, we will discuss the growth of consumer activism as well as the design and implementation of a sustainable marketing approach.				
Acquis d'apprentissage	 During their programme, students of the LSM Master's in management or Master's in Business engineering will have developed the following capabilities' Demonstrate independent reasoning,look critically and consciously acquired knowledge (both academic and common sense) and managerial practices, in light of emerging circumstances and their outcomes

Méthodes d'enseignement	The format is based on active learning and includes lectures, case studies, videos, incidents and class discussion, qualified speakers and a project work by group.				

Contenu	1. <u>Consumer sovereignty and sustainable consumption</u> : What are the different types of sustainable consumption patterns (e.g., buying fair-trade, buying green, but also sharing, recycling, re-using; we can also debates on simplicity, sufficiency and de-growth)? Who are the sustainable consumers? What are consumers' attitudes and behaviors toward consumption and sustainability? Which potential drivers might motivate consumers to use their buying power as a sort of "vote" for more responsible alternatives? What potential barriers might prevent consumers from acting more responsibly?
	 <u>Ethical issues related to marketing and consumption</u>: We will debate on the ethical critiques of consumerism, as well as some common ethical issues related to marketing and consumption (e.g., impact of consumption decisions on the economy and the environment, privacy issues in the interconnected world, digital property, deceit, outright lies, or manipulation).
	3. <u>The growth of consumer activism</u> : In this digital world, more than ever before, consumer movements challenge social order and transform it through the propagation of ideologies of consumption in hope of changing mainstream practices. Consumer activism tactics include boycotts, 'buycotts', petitioning the government, media activism, and organizing interest groups.
	4. <u>Sustainable consumption in practice:</u> we will explore the diverse strategies to foster sustainable consumption from creating new sustainable business models with the product-service system economy to downsizing and low-impact lifestyles or grassroots innovations. These new patterns of consumption will be studied through specific fields and case studies: food, waste, energy, finance, and housing.
