## Special Topics in Agricultural Economics

5 credits 30.0 h + 22.5 h Q1

Teacher(s)	Henry de Frahan Bruno ;  English  Louvain-la-Neuve					
Language :						
Place of the course						
Main themes	Topics are from research and studies recently published in the theoretical or empirical scientific literature but c to the domain covered by agricultural and natural resource economics. Depending on the instructors, the to can cover issues in agricultural, rural, food, regional, trade and environmental policy as well as issues relate rural development, poverty and management of natural resources as land, water and space.  So far as possible, topics are accompanied by initiation to quantitative methods as econometric estimations					
	mathematical programming.					
Aims	With respect to the learning outcomes of the Bio-engineering in agricultural sciences, this course contributes to the following main learning outcomes:					
	2.2 - 2.4: being exposed to focused state-of-the-art pieces of scientific work					
	6.1: reading and explaining published scientific papers					
	6.2 & 6.4, 6.5, 6.9: presenting published scientific papers					
	By the end of the course, students are able to:					
	<ul> <li>better understand the scientific approach in economics, in particular in agricultural and natural resource economics,</li> </ul>					
	- apply such approach to analyse a specific socio-economic issue of interest,					
	- understand journal articles in that research domain,					
	- assess the potential but also the limits of such approach.					
	This course is a good preparation for a thesis in agricultural and natural resource economics.					
	The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".					
Evaluation methods	Class participation and written examination at the end of each of the two workshops.					
Teaching methods	Two workshops, each led by a specialist from the academic or professional world, organised during a summer school and lasting five full days.					
Contont	2011, Louvain-la-Neuve, Belgium:					
Content	Imperfections in Rural Financial Markets in Developing Countries: Theoretical origins, Policy response and Impact evaluation (July 19-21, 2011), Prof. Steve Boucher, University of California, Davis, USA					
	2012, Uppsala, Sweden: Applications of Agricultural Trade Policy (August 15 - 17, 2012), Prof. James Rude, University of Alberta, Canada 2013, Budapest, Hungary:					
	Sustainable Energy Policy (August 12-15, 2013), Prof. Thomas G. Johnson, University of Missouri, USA <b>2014, Bonn, Germany:</b>					
	Consumer Food Choice and Policy (August 4-8, 2014), Prof. Sean Cash, Tufts University, USA					
	2015, Barcelona, Spain:  Multicriteria Decision Making for Agriculture and Environment (August 3-6, 2015), Prof. Slim Zekri, Sultan Qaboos University, Oman					
	2016, Louvain-la-Neuve, Belgium:					
	Field Experiments to Inform Policy and Programs in Development Economics (July 19-23, 2016), Prof. Nicholas Magnan, University of Georgia, USA
