## Introduction to pediatric neurology

4 credits

30.0 h

Q1

| Teacher(s)                  | Cilio Maria-Roberta ;De Volder Anne ;  |  |  |  |  |
|-----------------------------|--|--|--|--|--|
| Language :                  | French   |  |  |  |  |
| Place of the course         | Louvain-la-Neuve   |  |  |  |  |
| Prerequisites               | The prerequisite(s) for this Teaching Unit (Unité d'enseignement – UE) for the programmes/courses that offer this Teaching Ur are specified at the end of this sheet.  |  |  |  |  |
| Main themes                 | I. Brain development<br>II. Neurological examination of the child<br>III. Acute Neurological Disorders<br>IV. Developmental Disorders  |  |  |  |  |
| Aims                        | At the end of the course, the student will have acquired the necessary knowledge (genetic, neurological<br>and symptomatology bases) to understand how cerebral pathology affects cognitive, motor and language<br>development. The student will also understand the information needed for neuropediatric assessment as<br>a speech therapist. In the light of the learning outcomes framework, the course is aimed primarily at getting<br>students to:<br>A1. Master a knowledge base that helps to understand and explain: b) the normal and pathological<br>development of language, communication and computation.<br>D2. Interact and constructively collaborate with different actors involved in a given situation, integrate into<br>a team and participate to its dynamics in learning situations.<br>Second, this course aims to get students to:<br>A2. Observe, analyze, model, criticize and interpret in an argumentative way:<br>(B) A situation (relating to the normal and pathological development of language, communication and<br>arithmetic) with reference to theories and research findings, methods and tools related to speech therapy,<br>and based on knowledge from psychology, medicine and linguistics.<br>B1. Critical evaluation of knowledge:<br>(B) relating to normal and pathological functioning of a person in speech therapy.<br>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) |  |  |  |  |
| Tooching mothods            | can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".  |  |  |  |  |
| Teaching methods Content    | <ul> <li>I. Brain development</li> <li>II. Neurological examination of the child: outline and major syndromes</li> <li>III. Acute neurological disorders: Epilepsy impact on cognition and language; headache and in this context, cerebral tumours with specific management; Abnormal movements: TICS and TOCS; Traumatic brain injury and impact on cognitive development and language</li> <li>IV. Developmental disorders: (1) Global developmental delay; (2) Predominant motor disorder: Cerebral palsy and impact on cognitive development and language, swallowing disorders; Neuro-muscular diseases; Neurodegenerative diseases; Spina bifida; (3) Intellectual deficit: Genetic and environmental causes; Description of some genetic pathologies (X-fragile, Down syndrome, tuberous sclerosis, etc.) or of environmental origin; (4) Autistic Table</li> </ul>  |  |  |  |  |
| Faculty or entity in charge | ELOG   |  |  |  |  |

| Programmes containing this learning unit (UE)                            |         |         |                       |      |  |  |
|--|---------|---------|-----------------------|------|--|--|
| Program title  | Acronym | Credits | Prerequisite          | Aims |  |  |
| Bachelor in Psychology and<br>Education : Speech and<br>Language Therapy | LOGO1BA | 4       | LPSP1207 AND LPSP1208 | هر   |  |  |
