Teacher(s)	Lories Guy ;
Language :	French
Place of the course	Louvain-la-Neuve
Aims	<i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i>
Evaluation methods	Multiple choice tests. Specific modalities are described on the Moodle site.
Teaching methods	lecture and demonstrations
Content	Main techniques useful for a master thesis. Measurement, treatment comparison and simple surveys. Practical aspects (actual analyses using the software) will be dealt with in such a way as to make it possible for the students to actually run the analyses autonomously using the course material. New concepts will be introduced in a practical way (implementation and interpretation, with no mathematical content beyond what is strictly necessary to grasp the principle of the analysis).
Inline resources	Check the Moodle site for exercises, slides, a reference text and the code used for analyses.
Faculty or entity in charge	ELOG
