30.0 h

Q2

Teacher(s)	Crollen Virginie ;Van Reybroeck Marie ;
Language :	French
Place of the course	Louvain-la-Neuve
Aims	<i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i>
Evaluation methods	The course evaluation will consist in an oral presentation of a piece of research by the students, including the presentation of the advantages and the limitations of the piece of research. The students will be informed since the beginning of the course of this procedure.
Teaching methods	The course is based on presentations of scientific pieces of research and pieces of research applied to speech and language therapy that are going to be critically analysed during interactive activities with students. Secondly, students will be called upon to present a piece of research (theoretical framework, research questions, method, results, discussion and conclusion), and to present their advantages and limitations for the understanding of given situations.
Content	The course aims to develop ability to stand back regarding the advantages and the limitations of research in speech and language clinical therapy. It addresses different formats of scientific communication in order to acquire relevant skills in research communication.
Bibliography	Le support de cours inclus des diapositives et des exemples de présentations transmis aux étudiants via Moodle.
Faculty or entity in charge	ELOG
