

10 credits

Q2

Language :	English
Place of the course	Bruxelles Woluwe
Main themes	This activity takes the form of a 15-week research internship conducted in a laboratory abroad. The experimental project is left to the discretion of the trainee and the local training supervisor. It is validated by the coordinator of the activity at UCLouvain.
Aims	<p>At the end of this activity, the student will be able to:</p> <ol style="list-style-type: none"> 1. Clearly formulate the scientific objective of a research internship and outline the experimental plan for its realization. 2. Implement the experimental plan in its host laboratory. 3. Formulate and interpret the results obtained. 4. Communicate its results in an international context, in the form of a seminar in its host team. 5. Present your results in English in the form of a poster at UCLouvain, following the principles of poster presentations presented at international conferences. <p>-----</p> <p><i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i></p>
Evaluation methods	<p>An evaluation is performed by the host institution. It deals with the quality of the experimental work, and its communication during a seminar. Some partner institutions may request for evaluation a written internship report.</p> <p>The UCLouvain internship jury evaluates the presentation made by the student in the form of a poster. The final evaluation combines the one sent by the host institution and the one conducted by the UCLouvain internship jury.</p>
Content	Experimental research internship.
Inline resources	The information concerning this activity can be exchanged on its site moodle website.
Other infos	The candidates selected will be able to submit a request for funding proposed by UCLouvain to students on international mobility.
Faculty or entity in charge	FASB
