

In view of the health context linked to the spread of the coronavirus, the methods of organisation and evaluation of the learning units could be adapted in different situations; these possible new methods have been - or will be - communicated by the teachers to the students.

5 credits	30.0 h + 20.0 h	Q2
-----------	-----------------	----

Teacher(s)	Lejeune André ;Rees Jean-François ;
Language :	French
Place of the course	Louvain-la-Neuve
Aims	<i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i>
Evaluation methods	<p>Due to the COVID-19 crisis, the information in this section is particularly likely to change.</p> <p>Botanical part: written examination Animal biology part:</p> <p>Continuous assessment (online quiz, group work, certification test in audiancy, reports of practical work).</p> <p>In case of success of all parties (score equal to or greater than 10/20 for each part, passing certification tests in audience, if one of the notes (online quiz, group work, practical work BUT NOT THE CERTIFIED TESTS IN AUDIENCE) is less than 10, an average score of 15/20 makes up for this weakness), the student is exempted from the final exam.</p> <p>In the case of a final exam, the mark is the average of the mark of the other activities and of the exam.</p>
Teaching methods	<p>Due to the COVID-19 crisis, the information in this section is particularly likely to change.</p> <p>Lectures, online courses, practical courses</p>
Content	<p>Morphology and plant physiology</p> <p>Plant Morphology / Anatomy, Growth and Development; Transport in plants / Acquisition and transfer of resources; Plant and soil nutrients / Defensive responses of plants / Responses to internal and external stimuli /</p> <p>The sensory systems of plants / Responses to internal and external stimuli / Plant breeding / reproduction of angiosperms and plant biotechnology</p> <p>Morphology and Physiology of animals</p> <p>Animal body and regulating principle / Structure and function in animals, general / Nervous system / neurons, synapses and signals / Sensory systems / sensory and motor mechanisms / endocrine system / hormones and endocrine system / musculoskeletal system / sensory and motor mechanisms / digestive system / nutrition in animals / respiratory system / circulation and gas exchange / circulatory system / circulation and gas exchange / osmotic and urinary regulation / esmoregulation and excretion / immune system / reproductive system / reproduction in animals / animal development /</p>
