

In view of the health context linked to the spread of the coronavirus, the methods of organisation and evaluation of the learning units could be adapted in different situations; these possible new methods have been - or will be - communicated by the teachers to the students.

5 credits	30.0 h	Q2
-----------	--------	----

Teacher(s)	De Vleeschouwer Christophe ;Marichal Xavier ;
Language :	French
Place of the course	Louvain-la-Neuve
Aims	<i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i>
Content	The course introduces the technological components involved in a multimedia communication system. It surveys, in an accessible but rigorous manner, the main principles underlying computers, interconnected networks, and digital audiovisual signal processing applications. Large databases and social networks are also considered.
Faculty or entity in charge	COMU
