Teaching methods	<p>Due to the COVID-19 crisis, the information in this section is particularly likely to change.</p> <p>Participatory and active methods will be prioritized from the beginning. Practical student experiences will be particularly valued as far as possible. Professional and first line witnesses would be invited to share their own lived-through experiences closely related to matters addressed during the course (field actors, researchers, activists, ...).</p>
Content	<p>The course aims at developing the capacity to understand what is really at stake in the fields of politics in Africa (understanding the "why that?" but also the "why that this particular way?". It also aims at getting rid of lots of Westernized preconceptions and prejudices that prevent from properly deciphering the political "machinery" actually at work in Africa.</p> <p>The course is roughly split into three parts: (1) analyzing so-called "good governance" and democracy in Africa, (2) investigating political frames and dynamics in the light of five crucial analytical keys (individual, collective, norms and rules, power and change addressed from an African angle of view) and (3) practically probing the actual functioning of the political sphere in a selection of African countries (applying concepts and learning in working groups).</p>
Other infos	It is advised to have a basic knowledge of subsaharan Africa
