Economics of Finance and Risk Management - UNamur

In view of the health context linked to the spread of the coronavirus, the methods of organisation and evaluation of the learning units could be adapted in different situations; these possible new methods have been - or will be - communicated by the teachers to the students.

| 5 credits | 30.0 h | Q2 |
|-----------|--------|----|
| | | |

| Teacher(s) | Giot Pierre ; | | | | |
|-----------------------------|--|--|--|--|--|
| Language : | English | | | | |
| Place of the course | Namur | | | | |
| Main themes | This course focuses on interest rates and credit risk modelling with a particular emphasis on yield curve theo-ries, Monte Carlo simulations and tree-based approaches. Regarding credit risk modelling we focus on ratings models, yield-spread models and credit scoring models. | | | | |
| Aims | Gain a sound understanding of interest rates modelling (including the modelling of interest rates under uncer-tainty) and credit risk models. The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit". | | | | |
| Evaluation methods | Due to the COVID-19 crisis, the information in this section is particularly likely to change. Written exam (2H). | | | | |
| Teaching methods | Due to the COVID-19 crisis, the information in this section is particularly likely to change. Ex Cathedra No group work. | | | | |
| Content | The term structure of interest rates Modelling interest rates risk (trees, Monte Carlo simulations) One-factor and two-factor interest rates models Credit risk, including the KMV approach Introduction to options and futures | | | | |
| Bibliography | Santomero & Babbel: Financial markets, instruments and institutions (McGraw-Hill). Johnson: Bond evaluation, selection and management (Wiley). | | | | |
| Other infos | Objectifs: Advanced finance course focusing mainly on interest rate risk and credit risk. The course also deals extensively with simulation methods in finance (trees, Monte Carlo simulations). | | | | |
