Offshore Geotechnics

In view of the health context linked to the spread of the coronavirus, the methods of organisation and evaluation of the learning units could be adapted in different situations; these possible new methods have been - or will be - communicated by the teachers to the students.

4 credits	20.0 h + 15.0 h	Q2

Teacher(s)	Spinewine Benoît ;				
Language :	English				
Place of the course	Louvain-la-Neuve				
Main themes	The objective of the course is to provide an introduction to current geotechnical engineering practice in offshore conditions. Over the last decades, offshore geotechnical engineering has grown up as an independent branch of geotechnical engineering due to significant differences in the scale of foundation elements dealt with but also due to the challenging soil behaviour characterization. The course will cover site geotechnical and geophysical exploration techniques, soil characterization, and basic design approaches for a number of foundation elements often used in offshore structures, such as suction caissons, piles, anchors and spudcans, as well as elements of pipeline geotechnics.				
Aims	 Contribution of the course to the program objectives (N°) AA1.1, AA1.2, AA2.1, AA2.3, AA2.5, AA3.1, AA6.1 Specific learning outcomes of the course				
Evaluation methods	Due to the COVID-19 crisis, the information in this section is particularly likely to change. Will be given during the first course.				
Content	 The course will cover the following subjects: Introduction to offshore structures and industry (oil & gas, renewable) Offshore geotechnical and geophysical survey methods Specifc behaviour (calcareous sand, cemented soil, cyclic loading) Offshore foundation types and their relevance. Installation and bearing capacity of suction caissons, gravity base or shallow foundations, anchors, spudcans, piles Elements of pipeline geotechnics Elements of pipeline/cable trenching and protection methods 				
Inline resources	Available on Moodle.				
Bibliography	Randolph and Gourvenec. Offshore Geotechnical Engineering.				
Faculty or entity in charge	GC
