2019

Digital archiving

In view of the health context linked to the spread of the coronavirus, the methods of organisation and evaluation of the learning units could be adapted in different situations; these possible new methods have been - or will be - communicated by the teachers to the students.

5 credits	15.0 h	Q1

⚠ **This biannual learning unit is not being organized in 2019-2020 !**

Teacher(s)	François Aurore ;
Language :	French
Place of the course	Louvain-la-Neuve
Main themes	The second part of the course will be devoted to the conceptual handling of data (selection, elimination, making inventories, etc.), to its communication, and to the demonstration of the value of this activity. In-service visits to archives, meetings with archivists, and a series of lectures will round off and detail particular points of instruction.
Aims	1 Archivistics is a scientific discipline dealing with conservation, management, and proper use of archives, in whatever medium or format. Instruction will concern first terminology current in the field, and general principles, including technical and legal problems with preservation of data (problems inherent in new technologies of information and communication), questions of selection and elimination, of description and classification of catalogued items for permanent conservation, creation of research instruments (catalogues, inventories, guides, etc.), and the communication of this heritage and demonstration of its value to the larger society. - - - - *The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".*
