

In view of the health context linked to the spread of the coronavirus, the methods of organisation and evaluation of the learning units could be adapted in different situations; these possible new methods have been - or will be - communicated by the teachers to the students.

5 credits	30.0 h + 15.0 h	Q1
-----------	-----------------	----

Teacher(s)	Riviere Etienne ;
Language :	English
Place of the course	Louvain-la-Neuve
Main themes	<ul style="list-style-type: none"> <li>• Architectural principles of cloud computing</li> <li>• Scalability of cloud services (storage, computing, ...)</li> <li>• Building blocks for cloud services</li> <li>• Large scale computations in cloud environments</li> <li>• Programming models for cloud services</li> <li>• Providing scalable web services from the cloud</li> </ul>
Aims	<p>Given the learning outcomes of the "Master in Computer Science and Engineering" program, this course contributes to the development, acquisition and evaluation of the following learning outcomes:</p> <ul style="list-style-type: none"> <li>• INFO1.1-3</li> <li>• INFO2.2-3, INFO2.5</li> <li>• INFO5.2, INFO5.4-5</li> <li>• INFO6.1, INFO6.3, INFO6.4</li> </ul> <p>Given the learning outcomes of the "Master [120] in Computer Science" program, this course contributes to the development, acquisition and evaluation of the following learning outcomes:</p> <p>1</p> <ul style="list-style-type: none"> <li>• SINF1.M1</li> <li>• SINF2.2-3, SINF2.5</li> <li>• SINF5.2, SINF5.4-5</li> <li>• SINF6.1, SINF6.3, SINF6.4</li> </ul> <p>Students having completed this course successfully will be able to</p> <ul style="list-style-type: none"> <li>• explain the goals, benefits and models of cloud computing, providing practical examples</li> <li>• describe the main components of cloud computing</li> <li>• design and conceive cloud services which operate reliably at scale</li> <li>• explain how storage and virtualization are used in the cloud and apply this in practice</li> <li>• apply the fundamental principles of multi-tier web applications and services in a cloud environment</li> <li>• tackle big data computation problems (e.g., through the Map Reduce computing paradigm)</li> </ul> <p>-----</p> <p><i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i></p>
Evaluation methods	<p><b>Due to the COVID-19 crisis, the information in this section is particularly likely to change.</b></p> <p>The final grade is computed as follows for the first session (January):</p> <ul style="list-style-type: none"> <li>• Project 45%</li> <li>• Final exam 45%</li> <li>• Online quiz and peer review of other students work 10%</li> </ul> <p>It will not be possible to redo the project or the quizzes for the second session. However, the scale for the second session (September) is changed to:</p> <ul style="list-style-type: none"> <li>• Project 45%</li> <li>• Final exam 55%</li> </ul>

Teaching methods	<p><b>Due to the COVID-19 crisis, the information in this section is particularly likely to change.</b></p> <ul style="list-style-type: none"> <li>• Short lectures</li> <li>• Scientific readings</li> <li>• Quizzes (about readings, labs and lectures)</li> <li>• Practical lab sessions</li> <li>• Projects</li> <li>• Learning by peer-reviewing</li> </ul>
Content	<p>This course focuses on the issues and programming models related to cloud computing environments and distributed data processing technologies: data partitioning, storage schemes, stream processing, and "mostly shared-nothing" parallel algorithms.</p>
Inline resources	<p><a href="https://moodleucl.uclouvain.be/course/view.php?id=9880">https://moodleucl.uclouvain.be/course/view.php?id=9880</a></p>
Other infos	<p>Background :</p> <ul style="list-style-type: none"> <li>• LING11341</li> <li>• LSINF1121</li> </ul> <p>Recommended background:</p> <ul style="list-style-type: none"> <li>• Computer networks</li> <li>• Have a good understanding of computational complexity</li> </ul>
Faculty or entity in charge	<p>INFO</p>

Programmes containing this learning unit (UE)				
Program title	Acronym	Credits	Prerequisite	Aims
Master [120] in Data Science Engineering	DATE2M	5		
Master [120] in Computer Science and Engineering	INFO2M	5		
Master [120] in Mathematical Engineering	MAP2M	5		
Master [120] in Computer Science	SINF2M	5		
Master [120] in Data Science : Statistic	DATS2M	5		
Master [120] in Data Science: Information Technology	DAT12M	5
