

In view of the health context linked to the spread of the coronavirus, the methods of organisation and evaluation of the learning units could be adapted in different situations; these possible new methods have been - or will be - communicated by the teachers to the students.

3 credits	30.0 h	Q1
-----------	--------	----

Teacher(s)	Legay Axel ;
Language :	English
Place of the course	Louvain-la-Neuve
Main themes	The topics covered in the seminar will address Software engineering and programming systems. In particular, scientific articles are selected in these fields. On the one hand, students are confronted with problem of the quality of a scientific bibliography. Moreover, students read scientific literature (eg articles from international journals).
Aims	<p>Given the learning outcomes of the "Master in Computer Science and Engineering" program, this course contributes to the development, acquisition and evaluation of the following learning outcomes:</p> <ul style="list-style-type: none"> • INFO1.1-3 • INFO3.1, INFO3.2 • INFO5.3-4, INFO5.6 • INFO6.1, 6.4 <p>Given the learning outcomes of the "Master [120] in Computer Science" program, this course contributes to the development, acquisition and evaluation of the following learning outcomes:</p> <ul style="list-style-type: none"> • SINF1.M2-3 • SINF3.1, SINF3.2 1 • SINF5.3-4, SINF5.6 • SINF6.1, SINF6.3, SINF6.4 <p>Student completing successfully this course will be able to</p> <ul style="list-style-type: none"> • establish the state of the art based on the scientific literature, when confronted with a research problem beyond his current knowledge, • prepare a comprehensive report including a scientific bibliography and explaining its relevance to a theme, • synthesize a scientific article by explaining the context, challenges, innovative results, potential applications as well as tracks for further work in the field, • communicate orally the results of a research to a public of computer scientists not experts in the field, • interact with a person who presents research results showing a critical and constructive look over the work presented. <p>-----</p> <p><i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i></p>
Evaluation methods	<p>Due to the COVID-19 crisis, the information in this section is particularly likely to change.</p> <p>Presentation of ± 2 hours Report of ± 20 pages</p> <ul style="list-style-type: none"> - as rapporteur ... provides a personal summary of another session - as illustrator ... shows an instantiation of the models presented in some sessions, based on an application of your choice

Teaching methods	<p>Due to the COVID-19 crisis, the information in this section is particularly likely to change.</p> <p>Each student will play 3 different roles (in the different sessions):</p> <ul style="list-style-type: none"> - presenter during a session - rapporteur for a new session - illustrator for yet another session <p>The last two involve the writing of an individual report.</p>
Content	<p>The seminar will focus on articles that will be chosen (with students) from the following topics.</p> <ol style="list-style-type: none"> 1. code security 2. blockchain (including smart contracts) 3. ecological programming 4. Privacy and finger printing 5. Test and generation of test cases 6. Automatic repair (or not) of programs 7. Detection of cloned software. 8. Composition programming 9. The legibility of the code 10. The malware analysis by artificial intelligence 11. Deep learning and coding / protection 12. Advanced techniques of concurrent programming. <p>Students are free to propose new themes related to software engineering</p>

Bibliography	<p>D. Schmidt, M. Stal, H. Rohnert and F. Buschmann. Pattern-Oriented Software Architecture ' Patterns for Concurrent and Networked Objects. Wiley, 2001.</p> <p>--</p> <p>F. Buschmann, R. Meunier, H. Rohnert, P. Sommerlad and M. Stal. Pattern-Oriented Software Architecture ' A System of Patterns. Wiley, 1996.</p> <p>--</p> <p>E. Gamma, R. Helm, R. Johnson, J. Vlissides, Design Patterns ' Elements of Reusable Object-Oriented Software. Addison-Wesley, 1995.</p>
Other infos	<p>The research seminar should be followed the same year as the "end of study work" because it is a methodological support to its realization.</p> <p>It is not necessary to select the option corresponding to the seminar in order to participate.</p>
