

In view of the health context linked to the spread of the coronavirus, the methods of organisation and evaluation of the learning units could be adapted in different situations; these possible new methods have been - or will be - communicated by the teachers to the students.

3 credits	30.0 h	Q1
-----------	--------	----

Teacher(s)	Masquelier Etienne ;Schepens Bénédicte (coordinator) ;
Language :	French
Place of the course	Louvain-la-Neuve
Main themes	Principal themes required to achieve the goals of the course: - a presentation of the most occurring or disabling occupational diseases in our countries - a chronological view of the occupational world as well as its relationship with health - a presentation of some basic theories about communication to elaborate health sessions for workers Note that exercises in small groups will be used as well as ex-cathedra lectures. This course is part of the "Ergonomy and readaptation "orientation et is the follow-up of the course " Fondements de l'Ergonomie ".
Aims	<p>1 At the end of the course the successful student will have gained knowledge about a certain number of the currently used approaches in the prevention of several occupational diseases, from a bio-psycho-social perspective. Specific topics include theoretical and practical issues enabling the student to organise sessions for workers with specific occupational diseases.</p> <p>-----</p> <p><i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i></p>
