

In view of the health context linked to the spread of the coronavirus, the methods of organisation and evaluation of the learning units could be adapted in different situations; these possible new methods have been - or will be - communicated by the teachers to the students.

4 credits	15.0 h + 15.0 h	Q2
-----------	-----------------	----

Teacher(s)	Van Reybroeck Marie ;
Language :	French
Place of the course	Louvain-la-Neuve
Prerequisites	<i>The prerequisite(s) for this Teaching Unit (Unité d'enseignement – UE) for the programmes/courses that offer this Teaching Unit are specified at the end of this sheet.</i>
Main themes	Through clinical case studies of children and adolescents with problems of the dyslexia-dysorthography kind, 'at risk' pre-reading children, and children and adolescents with problems in reading, the following topics are covered in this course: demand analysis, selection of appropriate tests for anamnesis and complaints, analysis of results, formulation of diagnostic hypotheses, design of therapy using various techniques, checking the effectiveness and specific features of the intervention. This course is linked with the course on Oral language : examination methods.
Aims	<p>1 To learn the framework underlying the methodology for intervention in oral language by providing the relevant theoretical knowledge whilst also being aware of the limits of this knowledge. To learn how to communicate information in a precise and structured way, adapting it to different people encountered in clinical practice.</p> <p>-----</p> <p><i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i></p>
Evaluation methods	<b>Due to the COVID-19 crisis, the information in this section is particularly likely to change.</b> The evaluation method is described on the Moodle website of the course.
Content	Through clinical cases studies of children and adolescents with dyslexia-dysorthographia, 'at risk' pre-reading children, and children and adolescents with reading difficulties, the following topics are covered in this course: demand analysis, selection of appropriate tests according to the anamnesis, results analysis, formulation of hypotheses for the diagnosis, design of therapy using various techniques, evaluation of the effectiveness of the intervention.
Other infos	Support : internet website, documents distributed throughout the course Other : compulsory attendance required at weekly sessions.
Faculty or entity in charge	ELOG
