

In view of the health context linked to the spread of the coronavirus, the methods of organisation and evaluation of the learning units could be adapted in different situations; these possible new methods have been - or will be - communicated by the teachers to the students.

4 credits	30.0 h	Q1
-----------	--------	----

Teacher(s)	Uyttendaele Nathan ;
Language :	French
Place of the course	Louvain-la-Neuve
Aims	<i>The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".</i>
Evaluation methods	Due to the COVID-19 crisis, the information in this section is particularly likely to change. Open questions and multiple choice questions. See the Moodle page of the course for more information.
Teaching methods	Due to the COVID-19 crisis, the information in this section is particularly likely to change. Lecture and demonstrations based on real cases. Practical exercises will also be dealt with in class using the software R.
Content	Main techniques useful for a master thesis. Measurements, treatment comparisons and simple surveys. Practical aspects will be dealt with in such a way as to make it possible for the students to actually run analyses in an autonomous fashion using the course material. New concepts will be introduced in a practical way (implementation and interpretation, with no mathematical content beyond what is strictly necessary to grasp the principle of the analysis).
Inline resources	Check the Moodle page for exercises, slides and codes.
Faculty or entity in charge	ELOG
