## Reading comprehension and vocabulary extension: economic and commercial texts in German

In view of the health context linked to the spread of the coronavirus, the methods of organisation and evaluation of the learning units could be adapted in different situations; these possible new methods have been - or will be - communicated by the teachers to the students.

4 credits	22.5 h	Q1

Teacher(s)	Collard Marie-Luce ;
Language :	Deutsch
Place of the course	Louvain-la-Neuve
Main themes	The course is based on a detailed description of the linguistic (grammatical, lexical and stylistic) features that are typical of the economic and commercial domain as opposed to other registers of the German language. The focus is on significantly increasing specialised vocabulary to enable students to easily understand any text in this domain. Articles from newspapers, magazines, scientific books and websites are used for reading comprehension and vocabulary extension exercises.
Aims	At the end of the course, students should be able to understand economic and commercial texts in German and have acquired a solid vocabulary in these areas (at C1 level of the Common European Framework of Reference).
	The contribution of this Teaching Unit to the development and command of the skills and learning outcomes of the programme(s) can be accessed at the end of this sheet, in the section entitled "Programmes/courses offering this Teaching Unit".
Evaluation methods	Due to the COVID-19 crisis, the information in this section is particularly likely to change.  Written examination during the session: reading comprehension questions on original texts related to themes covered in class and vocabulary exercises based on vocabulary studied in class.
Content	The course is based on a detailed analysis of economic and commercial German using original texts. These articles are centred on important themes, particularly macro-economics, trade, sales techniques, accounting, the management and structure of companies, production and staff recruitment. Various exercises and internet research are used to enhance reading skills and vocabulary extension in this domain.
Other infos	Course materials: Texts used include current economic affairs, theoretical texts on economic issues and internet and newspaper articles.
